## SOFTWARE DEVELOPER

Knoxville, TN, United States | [kxtnluc@gmail.com](mailto:kxtnluc@gmail.com) | 8658886218 | <https://www.linkedin.com/in/kxtnluc>

### PROFILE

Full-stack software developer with full time experience in building scale-able web and desktop applications using C#, ASP.NET, React, and SQL. Strong background in API integration, financial data processing with Plaid and Stripe, and UX design. Skilled in Blazor, .NET MAUI, and modern JavaScript frameworks like Svelte. Passionate about problem-solving and delivering clean and simple user-focused applications.

### TECHNICAL SKILLS

React	ASP.NET	Git	SQL
JavaScript	CSS	EF Core	Postgresql
TypeScript	API	MAUI	Plaid
C#	Balzor	Svelte	Stripe

### PROFESSIONAL EXPERIENCE

#### Software QA, TACInsight | Knoxville

July 2024 - present

- Conducted quality assurance testing for software updates, documenting and tracking issues and collaborating with development teams for resolution.
- Tested various programming tools to facilitate new app development, ensuring functionality and performance meet company standards.
- Utilized React, TypeScript, Blazor .NET MAUI, SQLite, MySQL, and ODBC to support robust application development.

#### Full Stack Web Developer, Fiverr | USA

February 2024 - May 2025

- Collaborated with clients to develop a web app for senior citizens, emphasizing user-friendly UI and UX design.
- Developed in React, TypeScript, and C#. Utilizing tools like EFC, Postgresql, and Stripe for site subscriptions.
- Prototyped a client's restaurant portfolio website, using SvelteKit and custom CSS.
- Prototyped a local client's PT Clinic's business page, using Figma and DB Diagrams.

### EDUCATION

#### Full Stack Web Development, Nashville Software School

August 2023 - February 2024

NSS is a six-month intensive, full-time software development boot-camp focused on full stack development fundamentals and problem solving. This program ran us through JavaScript, HTML, CSS, React on front-end, with C#/.NET and SQL on the back-end.

### PROJECTS

#### Hearth ( Windows Software ) | [see project](#)

January 2025 - present

Hearth is a Banking and Finances Manager application I am developing for Windows, using .NET Maui Blazor Hybrid, SQLite, and the PLAID API for retrieving and authenticating Bank data and transactions.

- App has full CRUD Functionality
- Uses Blazor MAUI and SQLite
- Styled using custom CSS Library
